Our Featured Manitoba Tour

Each year in the fall, along the west shore of Canada's Hudson Bay, one of the world's most fascinating wildlife events occurs. Scores of polar bears gather along the shore near Churchill, Manitoba waiting for the bay to freeze so they can begin the annual hunt for their choice prey, seals. If one has been fortunate enough to view a documentary that features these Lords of the Arctic, chances are that it was filmed in Churchill from one of the Tundra Buggies. Polar bears are normally solitary creatures but in Churchill, at this time of year, one can see them gathering and mothers and cubs will often be seen together. Wildlife enthusiasts and photographers throughout the world travel to Churchill in order to witness this remarkable event. The dates we have chosen to do our day tours on are the best dates to view the bears!
